Claim Rejections - 35 USC § 112

1. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 11, line 2, the drive member is positively recited for a second time, raising issues of double inclusion.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith.

Smith shows a cap member having a first side 24; second side 26; measuring chamber 22; first disk member 23; passage 35; second disk member 43; passage 44; the disk members are interconnected as they are all a part of the cap structure; the tabs or pins discussed in column 4, lines 52-54 are capable of engaging a drive shaft; cutaway portion 35; and threads 28.

Allowable Subject Matter

4. Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 8-10 and 12 are allowed.
6. Claim 11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Taylor, Jr., Lehn and McCowan show other fluid mixing dispensers; and Doelle, Steinmetz, Morrow and Palmer show other rotating dispensers with trap chambers.
